

Apicry Pages

Login - Obviously

- Home - Summary of all other sections
- Data Agent Manager - see all agents
 - Label agents
 - Shutdown Agents
- Add data source
 - From files and directories
 - Tick list with agents to be sent to
 - From logs Stats
 - From cimeter
 - Select single agent of cimeter node
- Search - search data (~~limit to sources~~) (automatic)
 - choose timeframe
 - choose sources (optional)
 - Must take regex with language
 - Each result show host
 - Show frequency of search results overtime (D3)
 - Save search!
 - Events tab, show Events in table
 - Visualization tab, pics, graphs etc, options save
- Network Page
 - Try to ascertain topology from logs/other data
 - And
 - Curvature style display
 - Colours for load? Cimeter data
 - Different displays, heat for particular search
heat for load
- Alerts
 - Manage Alerts for saved searches
 - Simple list
 - New - Conditions, alert on, search
 - Delete
- Dashboard
 - Spaces where saved searches, visualizations, network visualizations.

can be arrange and saved

Network

Try to infer topology
from IP addresses / hostnames
mentioned in logs on each
device, or mentioned by others

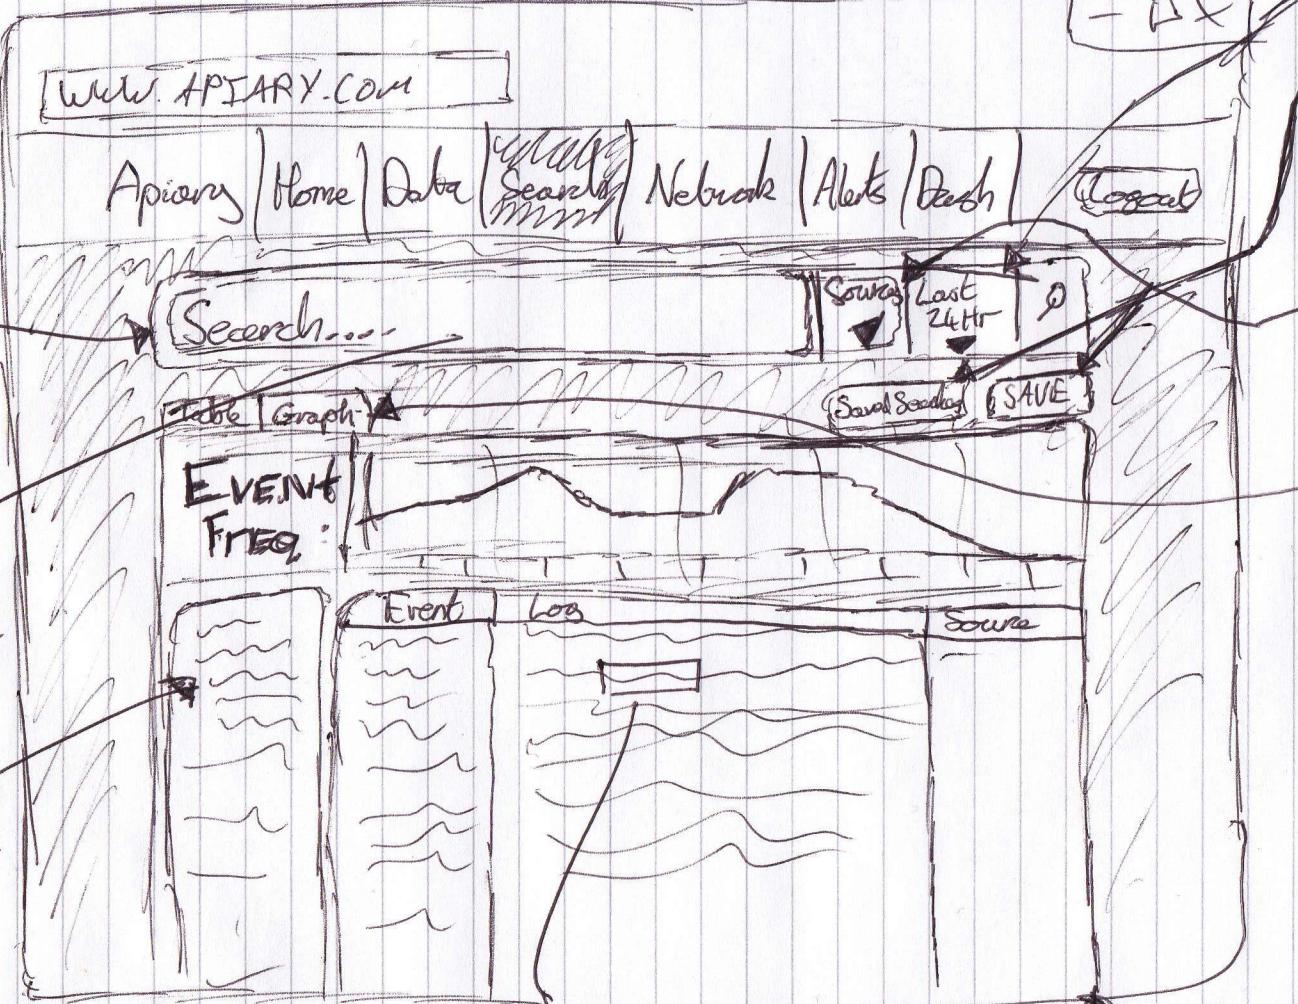

Use full screen, like certificate

Vary color/size depending
on heat. Both nodes
and edges

Hostname by node

Timeline slider?
View historic events.

Search

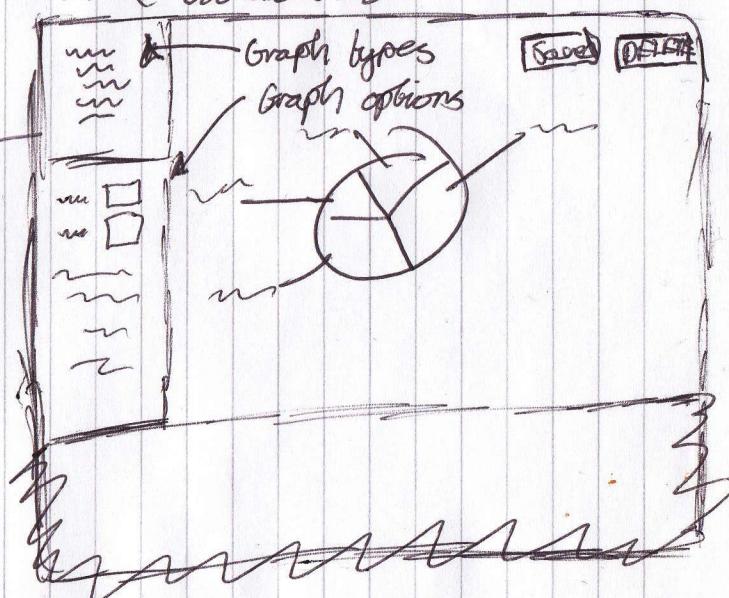

Drop down with timeframes (possibly slide) from/to

Saved searches

- Modal window with list of saved searches
- Click to load
- Save over old

Modal menu with list of sources and tickboxes.

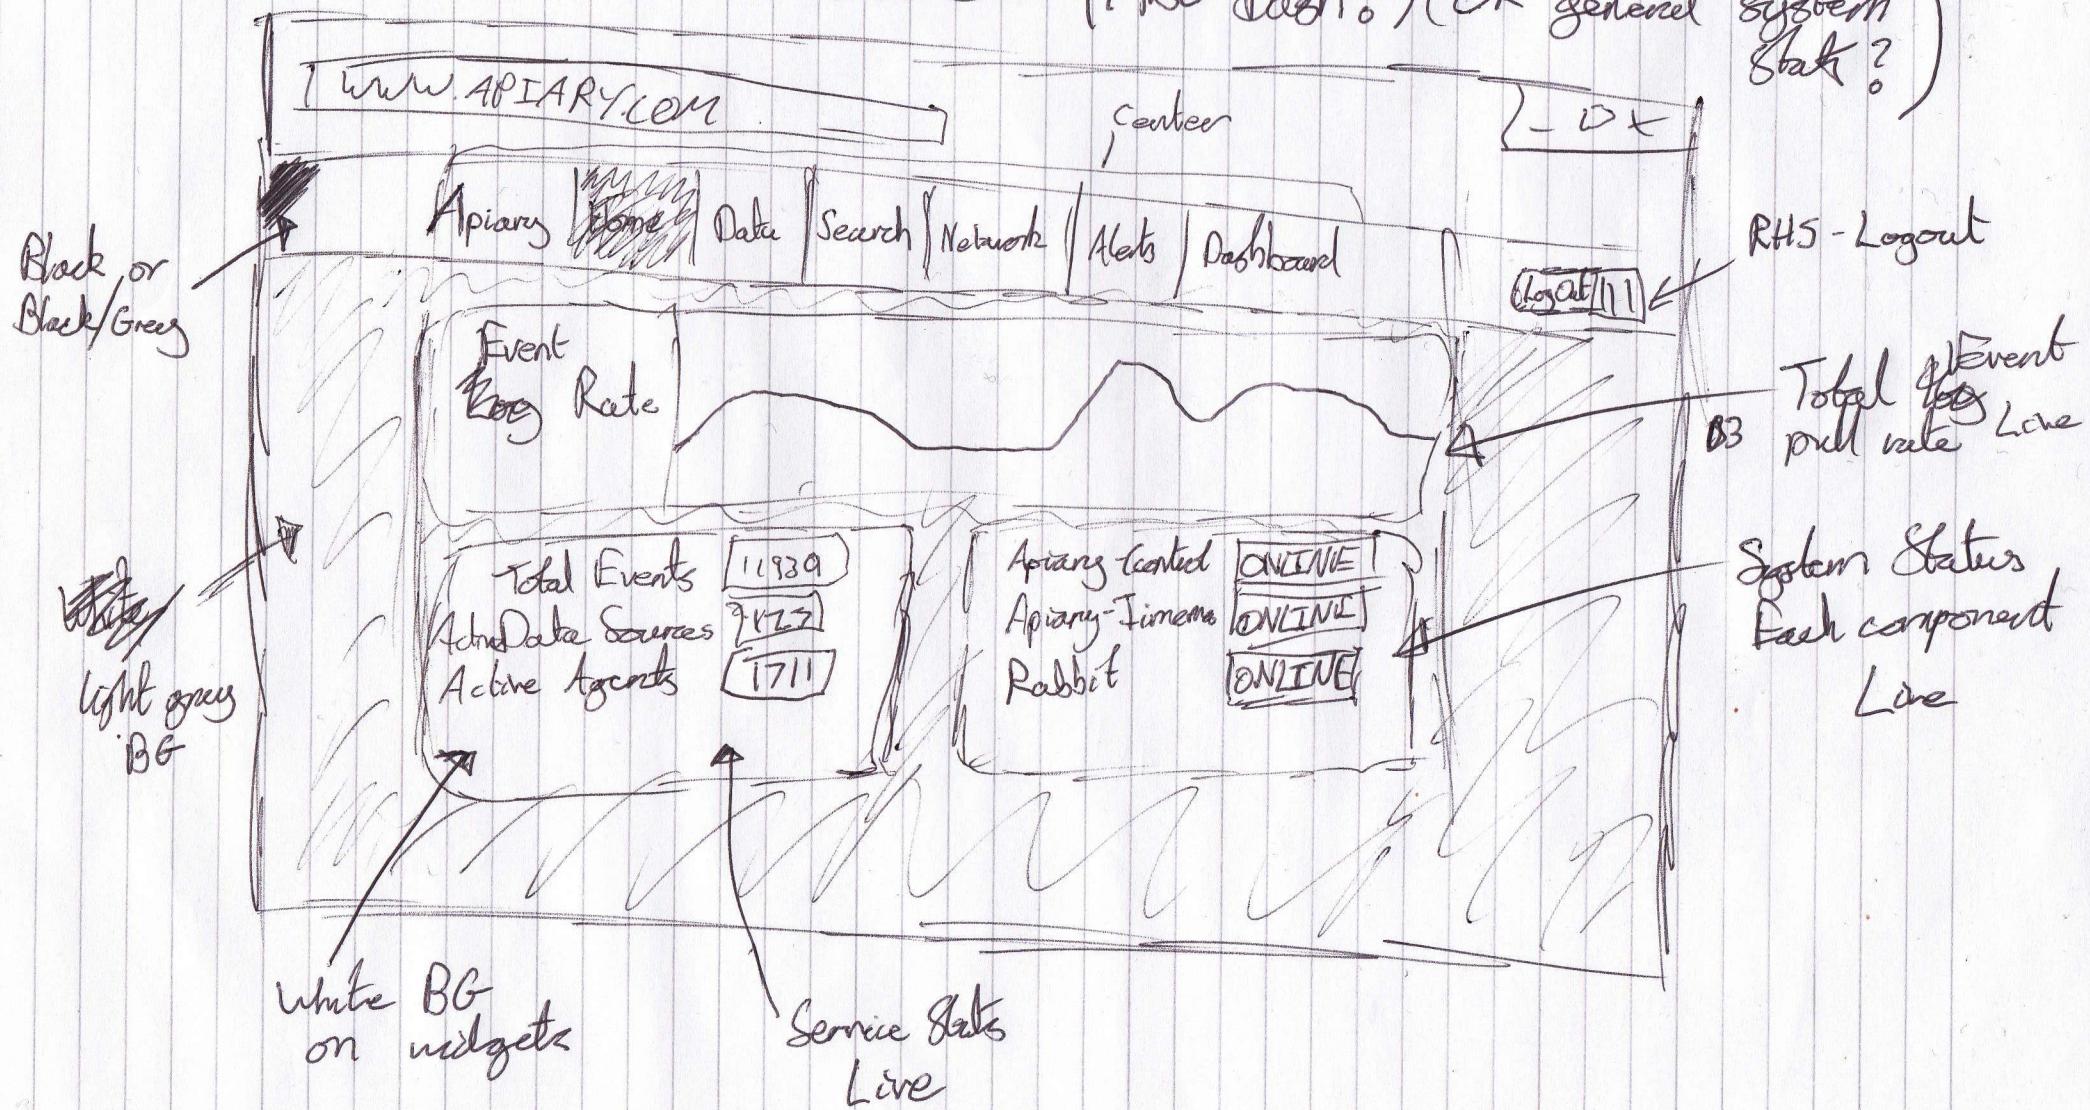

5px

stretchy all content across
as much as possible

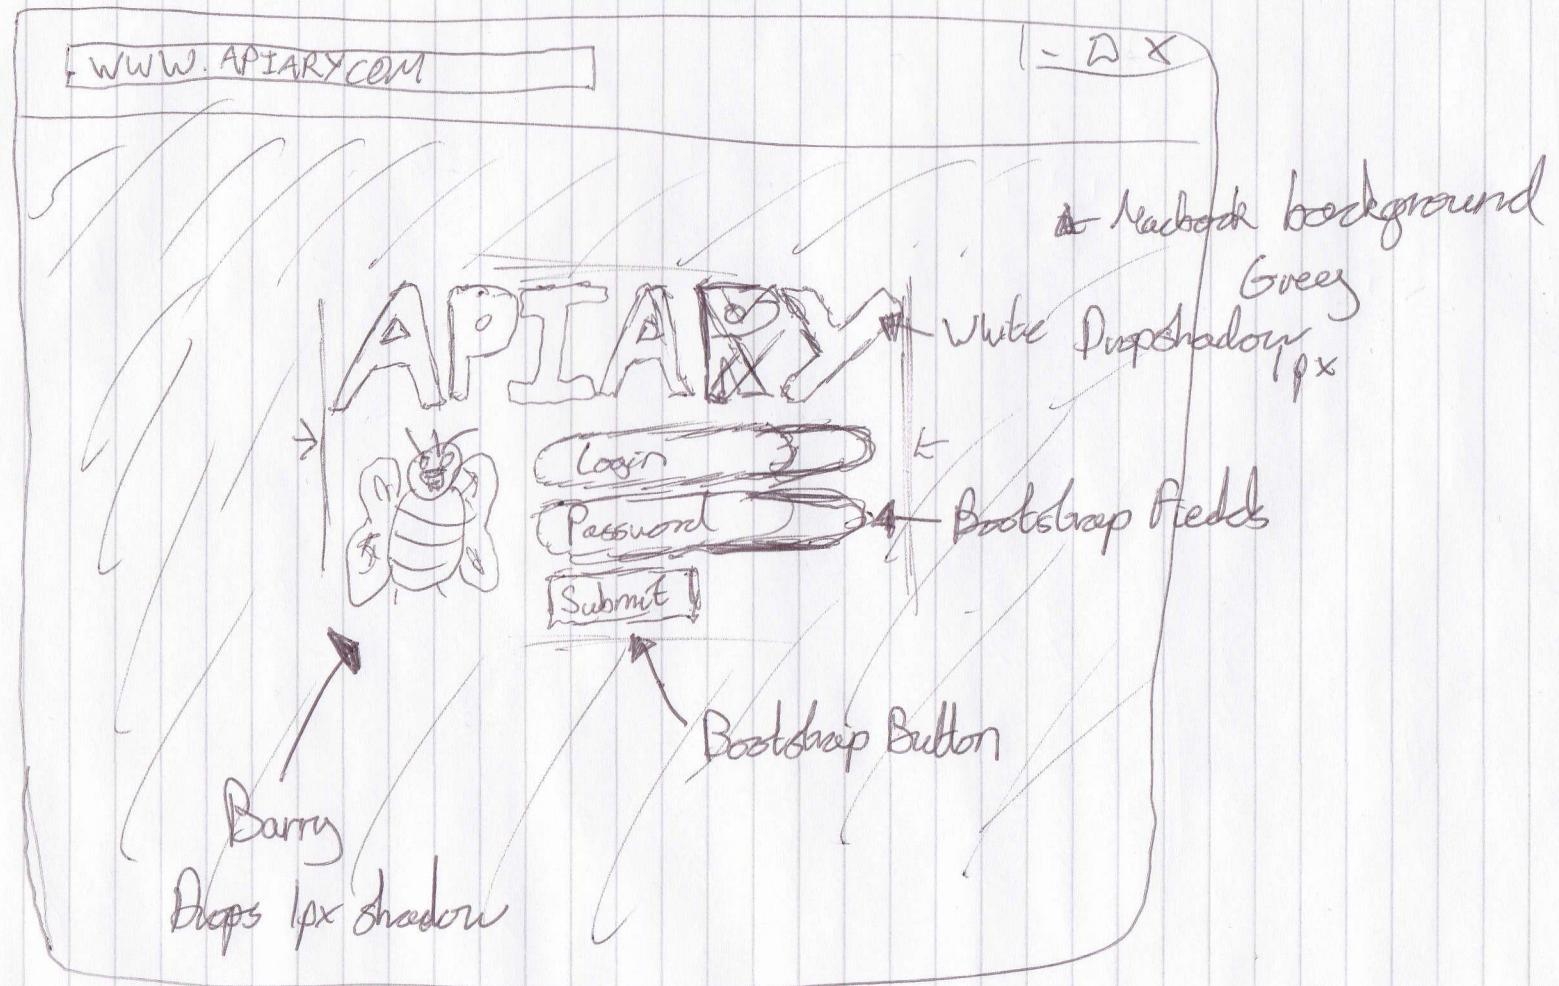

Fresh logs always coming in!

Infinite page?
(load new entries when at bottom?)

Home (Also Dash?) (OR general system state?)
